Rules of the road

- **Payoffs are the live balance, not the round number.** Open the card app that day and pay what it shows; the figures here include estimated interest to the date.
- **No new charges on the next card to die.** Citi 3208 and Amex Platinum from today; Biz Plat in October; Biz Gold and Citi 8018 in November. Day-to-day spending goes on the Sapphire.
- **Rent safety on Sep 27.** Checking sits near \$3,450 before Jessica's Sep 30 check. If rent could draft before her pay posts, make only the three payoffs on the 27th (\$20,730) and send the \$2,200 to Biz Plat on the 30th once her check clears. Cost: about \$6 of interest.
- **Expect a trailing-interest charge** on each card the statement after its payoff, typically \$30–\$100. Pay it when it posts; the Jan 15 line sweeps whatever remains.
- **Loans need a payoff quote.** SoFi and Wells Fargo charge per-diem interest; get the quote a few days before Dec 27 and Jan 27 and pay that figure. The IRS balance updates daily in your online account; pay what it shows on Jan 27.
- **The app is the truth.** The Payoff page recomputes the funds check from live balances on every open; this sheet is the plan as of today.

Cash walk if everything lands as planned: Sep 12 ≈ \$1,580 after the payment · Sep 15 ≈ \$3,700 after IRS + payment · Sep 27 ≈ \$4,450 · Sep 30 ≈ \$11,150 · Oct 1 after rent ≈ \$4,300 · Oct 14 ≈ \$1,500 · Oct 15 paycheck.
